PROFESSIONAL SUMMARY

AWS and DevOps-focused B.E. Graduate with hands-on experience deploying containerized applications on AWS with ECS Fargate and EC2 and automating infrastructure with Terraform. Proficient in CI/CD pipeline design with Jenkins and Git, and seeking an entry-level DevOps/Cloud Engineer role to expand expertise in cloud infrastructure and automation.

SKILLS

Cloud Platforms: AWS (ECS Fargate, ECR, RDS, VPC, Security Groups, ALB, CloudFront, ACM, Route 53, IAM)

Infrastructure as Code: Terraform

Containerization: Docker, Kubernetes (fundamentals)

CI/CD: Jenkins, Git, GitHub

Languages & Databases: Python, SQL, MySQL, PostgreSQL, Bash

Platforms & Tools: Visual Studio Code, Linux, GitHub

Monitoring & Logging: CloudWatch, Grafana

EXPERIENCE

DevOps Intern | BDreamz Global Solutions Private Limited, Bangalore May 2026 - October 2026

- Deployed and maintained containerized applications on AWS using ECS Fargate, ECR, and RDS across 2+ production environments.
- Designed and configured Jenkins CI/CD pipelines with Git integration, automating build, test, and deployment processes for Docker containers, reducing manual deployment steps by 70%.
- Managed AWS infrastructure including VPC, subnets, Application Load Balancers, and security groups using Terraform (IaC).

PROJECTS

Multi-Tier E-Commerce Application on AWS

React, Node.js/Express, MySQL, Docker, Terraform, Kubernetes (EKS), GitHub Actions

- Architected and deployed a 3-tier e-commerce app (React, Node.js/Express, MySQL on RDS) with infrastructure fully provisioned via Terraform (VPC, EKS, RDS, ECR, IAM).
- Containerized frontend and backend with Docker; orchestrated on Kubernetes (EKS) with LoadBalancer services and replicated deployments.
- Built a CI/CD pipeline with GitHub Actions to automate Docker builds and pushes to Amazon ECR on every commit.
- Implemented JWT authentication, bcrypt password hashing, and transactional order processing with stock validation.

Static Website Hosting on AWS S3 with CloudFront (CDN)

AWS (S3, CloudFront, OAC), HTML/CSS/JavaScript

- Deployed a static website via an S3 origin and CloudFront CDN distribution, reducing global content delivery latency by 50%.
- Configured Origin Access Control (OAC) to restrict direct S3 access, serving content securely only through CloudFront.
- Optimized CloudFront cache policies and TTL settings, reducing bandwidth costs by 25%.

EDUCATION

B.E. in Computer Science and Technology | Karpagam College of Engineering (Anna University) | March 2026 | CGPA: 7.5

CERTIFICATIONS

- Completed Infosys Springboard certification in Programming Using Python (Aug 2024)
- Completed NPTEL course on Enhancing Soft Skills and Personality (Oct 2025)

LEADERSHIP & ACTIVITIES

- Presented a paper on Sixth Sense Technology at Kongu Engineering College, Erode (Feb 2025).
- Contribute to technical events and team collaboration as an active member of IEEE.
